

Impact Stone Crusher Machine

Basic Information

- Place of Origin: Zhengzhou, China
- Brand Name: Ascend
- Certification: ISO9001, CE
- Model Number: PF0607 PF0807 PF1008 PF1010 PF1214
- Minimum Order Quantity: 1 set
- Price: negotiable
- Packaging Details: Large part is non-packed but rustproof and moisture proof then wrapped by plastic sheeting before delivery. The small parts are packed into wooden box.
- Delivery Time: 10-20 working days
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 20-50 sets per month

Product Specification

- Application: Construction Works , Energy & Mining
- Capacity: 10-120tph
- Spare Parts: Long-term Supply, Sufficient
- Warranty: One Year
- Input Size: <100mm, <500mm
- Founction: Primary Crushing Or Secondary Crushing
- After Sall Service: Engineers Available To Service Machinery Overseas, Online Support, Field Installation, Commissioning And Training, Video Technical Support
- After-sales Service Provided: Commissioning And Training
- Highlight: **Impact limestone crusher machine, limestone impact mill rock crusher**

Product Description

Good Quality Impact Crusher

Impact Crusher can crush the large, medium and small size materials (granite, limestone, concrete ,etc.) with max feed size less than 500mm and compression strength less than 350Mpa.

It is widely used in metallurgy, mine, cement, chemical engineering, fire resistant materials, ceramics and other industrial sectors, as well as in the expressway construction, water conservancy project, building crushed stone, and machine-made sand process fields, etc.

Presently, by practices, its comprehensive function is superior to the cone crusher and the hammer crusher.

impact crusher, granite rock crusher , stone crusher used Features:

Special structure, keyless connection, high-chromium plate hammer, particular impact liner;

Crushing hard rock, high-efficiency and energy saving;

Cubic shaped, granule of the final products can be adjusted, simplified crushing process.

By technical improvement and research development, the new type of dedusting device can be configured to eliminate the dust and benefit to the environment.

ASCEND

Working Principle

Impact crusher a kind of crushing equipment that using impact energy to crush material driven by motor. When the materials get into the area where the plate hammer effects, by whose high speed impact function, the crushed materials are thrown to the impact device above the rotor continuously, and then they are rebounded from the impact liner to the effect area of the blow bar to be crushed again. The materials are crushed from big-size to small-size in the impact cavity repeatedly. The process goes on until the materials are crushed to the required size and then discharged from the discharging chute.

Main technical parameters
