## Product Description

### High efficiency good quality Hammer crusher mill for sand making and aggregates

Hammer Crusher is suitable for crushing medium-hardness materials such as limestone, slag, coke, coal and so on in cement, chemical, electric power, metallurgy and other industrial departments. It has the advantages of simple structure, large crushing ratio and high production efficiency, which can break both dry and wet forms., Hammer Crusher can adjust grate strip gap according to user's requirement, Change the size of the material, This can meet the different needs of different users.

## Working Principle

In the hammer crusher mill machine, the motor drives the rotor to rotate at a high speed through the belt, and on the rotor there are series of hammers. When the material gets into the working area of hammers, the rotating hammers with high rotation speed are crushing the material, the crushed product meeting the required size can be discharged by the outlet and become the final products, the large size product are brought back to the crushing area by the hammers for being re-crushed until they reached the required size.
